

M. S. T. A. Leads
Ten thousand teachers will be enrolled for the Kansas City meeting of the Missouri State Teacher's Association, November 4-6, 1915 and Missouri will be the first state in the union in association enrollment, according to reports from the school men of the state to the Secretary of the Association. At least sixty counties will dismiss their associations so that teachers may go to Kansas City, and three or four hundred towns will enroll practically as a unit. The enrollment from the Normal Schools, Colleges and Universities will be greater than ever. Every county in the state will be represented. President Hill has been fortunate in securing some of the leading educators of the country for the general program. Among these are Dr. J. F. Hasic, Chicago Normal College the most eminent authority on teaching of English in the grades in America; Dr. H. H. Goddard, Vineland, N. J., author and lecturer of education; Hon. S. D. Fess, Yellow Springs, Ohio, President Antioch College, author, congressman and member of President Wilson's Commission on Vocational Education; Dr. E. A. Steiner, Grinnell, Iowa, noted sociologist, lecturer and author; Dr. Jay W. Hudson, Columbia, special lecturer of America School Peace League; Professor Albert S. Cook, Baltimore County Md., educator and the leading county superintendent of the United States; Mary Antin, New York, famous lecturer and author one of America's most noted women. The departmental programs, as arranged by the department chairmen, are also excellent and contain the names of many of the state's leading educators.

Our gold reserve may be threatening the structural strength of the banks in the east, but it is harder to borrow a quarter out this way now than it was to get a dollar before the war loan was made.

Stops Falling Hair

Hall's Hair Renewer certainly stops falling hair. No doubt about it whatever. You will surely be satisfied.

Good or Bad Effect
Suffragists throughout the country as well as in New Jersey were sure the declaration made by President Wilson would settle the election and that women in New Jersey would secure the franchise. While he stated only his personal views, there can be little doubt but that the activity of the antis was accelerated thereby. No matter what great man it may be, if he "puts in" on such issues, resentment will be awakened, but when that covert undertaking is in opposition to 75 to 90 per cent of the populace views, disaster is doubled for his side. It is said that the presidents affianced is opposed to woman suffrage and if this be true, her sentiment, aided by the outcome in his state, will be sufficiently deterring for the future to insure the great mans' silence on the subject. It was a grievous mistake he made and no one could feel more keenly its outcome, we imagine, than the sensitive, good, home loving and un-officious man. This experience will surely serve to induce him finally to offer no suggestion for use by agitators of another and really more important question. As in this case, while it might kick better than it shoots and serve those it would be intended to defeat, additional loss of prestige would endanger political prospects far more exceedingly.

For Indigestion
Never take pepsin, and preparations containing pepsin or other digestive ferments for indigestion, as the more you take the more you will have to take. What is needed is a tonic like Chamberlain's Tablets that will enable the stomach to perform its functions naturally. Obtainable everywhere.

The great newspaper issued by the Christian Science people at Boston, editorially, mentions the fact that the liquor interests are in the fight against women's suffrage. The paper makes no comment other than that the efforts of the anti-suffrage people are constant and unvarying because the liquor interests who see that their business is to a great extent menaced by the women's vote.

CITY and COUNTY DIRECTORY

DISTRICT AND COUNTY OFFICERS
Judge W. W. Rucker...Congressman

Business Revivals
The country ought to be revived. The "Sunday" system of tabe nacle meetings has given birth to a horde of similar meetings on a smaller scale. There has been one at Salisbury, now one at Marcelline, one at Chillicothe and in divers other places. The evangelist is assisted by pianists, a soloist who pulls out the "sob" stops, ushers, etc., and the affair is financed, a tabernacle is built and free-will offerings which in some cases at least, are diligently rcted for by the evangelist who is a sincere convert to the doctrine that the laborer is worthy of his hire. In Lincoln, Ill., a tabernacle was built that cost \$2500, to be torn down immediately after the end of the meeting. The "revival" teams are on a purely business basis and the near future will bring more diligent inquiry into the value of services for the money spent. The only difficulty is the method of assessing the value of a life reclaimed from wrong to right doing. Perhaps some times the actuaries of a life insurance company or similar organizations may assess the value of a life charged at certain ages and compute the real money value of a soul saved. Thus we may arrive at the real value of the business revivalist's labors.

Worry Destroys Health
Mental strain undermines health probably more rapidly and destructively than physical disease. Observe how long it takes a man or woman to recover from an attack of nervous prostration. See what a complete breakdown often follows even a short period of intense mental strain. The reason is this: In the case of disease its ravages are promptly observed and suitable remedies applied. Mental strain, however, slowly consumes the reserve vitality until, finally, when a breakdown occurs, there is no reserve strength upon which nature can draw. People who worry or are under severe mental strain, require suitable nourishment to create immediate energy and build reserve force; nourishment which will be promptly converted into strength, and, above all, good cheer and happy thoughts. If people so afflicted would first disabuse their minds of disturbing thoughts, cultivate cheerfulness, and take Scott's Emulsion after meals, their immediate improvement would be an agreeable surprise. Being essentially a food, Scott's Emulsion is absorbed by the body as such and appropriated by nature to nourish the nerve-centers, enrich the blood-corpuscles and build resistive-force. It contains no habit-forming drug or alcohol, and its nourishing, curative benefits are apparent almost from the first day.

Prepare Bees for Winter
Remove honey at once.
Leave plenty of winter food.
Don't spill or smear honey about the hive. It leads to robbing.
Don't chill the bees while clearing the supers. Choose warm days for this work.
Wrap each hive with a layer of tarpaper or other heavy, wind proof material.

If any supers are left on the hives, remove the sections and fill the space with a bag of dry leaves.
Set the hives on a south slope and do not leave the front high enough to let snow or water blow or run in.
The bee house or cellar is rarely or never used as far south as Missouri. A strong swarm properly prepared in a good hive and properly fed will get through the winter well.—L. Haseman, University of Missouri, College of Agriculture.

Notice—Land for Sale
The undersigned executor of the estate of John J. Mass, late of Mills County, Iowa, in order to close up the estate, has for sale, the East (E. 1-2) of the East half (E. 1-2) of the South West Quarter (S. W. 1-4) and the South half (S. 1-2) of the South East Quarter (S. E. 1-4) of Section 27, Township 53, Range 17, in Chariton County, State of Missouri.
This land must be sold for cash and no trades considered. If interested in the same write to the undersigned for full particulars and information.
36tf M. Kehoe,
Silver City, Iowa.

"Hog Killing" Time
The frosty mornings lately indicate the rapidly approaching time for butchering. The expert at the State Agricultural College says it is better to select for butchering before the porkers intended for home consumption get too fat. When put up, feed a little shorts, oil meal or wheat along with the corn—it produces muscle and lean meat. All fat makes poorer cuts.
The farmer should slaughter more hogs than is needed for the home. Good bacon, hams or shoulders will always sell at good price. Good country cured hams are always in demand at top price.

Plant Fruit Trees at Once
All perfectly hardy trees should be transplanted in the fall rather than the following spring if we can rely upon the results of tests made at the Missouri Agricultural Experiment Station. Johnathan apple trees planted in the fall made nearly twice as good a growth as those planted the next spring. Of cherry trees transplanted in the fall of 1913 every one lived while only a third of those planted in the spring of 1914 survived the dry summer of that year. Those which did live made only a quarter as good a growth as those planted the fall before. This comparison is based mainly on the terminal growth or length added to the branches which is a very important means of telling how an orchard is thriving. Even peach trees and others less hardy than apple and cherry trees do better when fall planted in the Southern quarter of Missouri. Fall planting is better even farther north if followed by a mild winter but a severe winter is likely to kill the trees.

Fly After The wheat
It is reported that the fly is working in the wheat. Some of the wheat was planted later than usual. The University of Missouri recommended the planting this year not earlier than October 10. The earlier the wheat, the worse the attacks of the fly. If all the people here had waited until October 10 or later, it would have been a good chance to see the value of the university recommendations. It evidently pays to keep the eye on these bulletins which comes a result of direct experiments and research that is far beyond the observation or capacity of the average single farmer to obtain. This may be accepted as a truth—we must fight the fly and bug. Now is not too early to start.

Newspaper At Wakenda
A newspaper has been started in Wakenda. It is a stiff proposition, starting a newspaper in Wakenda, or any town that size and the newspaper man who got the handful of type together for the No. 4 issue of the first volume had plenty of nerve or something else. Under modern newspaper conditions it looks like a task equal to the ten labors of Hercules, to make a newspaper "go" in a town the size of Wakenda. It looks like a man might as well tackle the German army single-handed.

THE CHARM OF MOTHERHOOD

Enhanced By Perfect Physical Health.
The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at such times, but many approach the experience with an organism unfitted for the trial of strength, and when it is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under the right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health resulting from an unprepared condition, and with ample time in which to prepare, women will persist in going blindly to the trial.

Every woman at this time should rely upon Lydia E. Pinkham's Vegetable Compound, a most valuable tonic and invigorator of the female organism.
In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy and strong.
If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

When Baby Has the Croup
When a mother is awakened from sound sleep to find her child who has gone to bed apparently in the best of health struggling for breath, she is naturally alarmed. Yet if she can keep her presence of mind and give Chamberlain's Cough Remedy every ten minutes until vomiting is produced, quick relief will follow and the child will drop to sleep to awaken in the morning as well as ever. This remedy has been in use for many years with uniform success. Obtainable everywhere.
